Feasibility

Before this report was assembled, the design was checked against the brief constraints. The verdict below is computed deterministically from the sizing solver, bill of materials, and cost waterfall — not from language-model opinion.

2. Regulatory posture

Regulatory analysis not yet performed

The compliance review stage has not yet run for this project. When it completes, this section will list each applicable standard with its status, owner, and next gap action. Until then, do not use this document for procurement or regulatory submissions.

Bill of materials (0 rows)

ADB

BOM derived from the module decomposition, expanded into typed part rows. Each row links back to its source module.

No parts generated yet.

5. Cost waterfall

ADB

Cost estimates derived from the module decomposition and the project's cost-estimate data. Per-module figures roll up to the unit cost shown on the cover page.

UNIT COST (ALL-IN) —	CEILING (BRIEF) —	HEADROOM —
-------------------------	----------------------	---------------

No per-module cost data available yet.

Supplier shortlist (0)

'LLM | DEEPSEEK-V4-FLASH

Shortlist built by scoring each supplier in the directory against each module's declared process and material.

No suppliers shortlisted yet.

8. Project audit log (0)

Actions recorded against this project — brief lock, ship, other auditable mutations.

No audit events recorded.
